Over **1** Multimode Fiber

The Mini-DVI Series is a high performance, low cost, miniature, directly pluggable Fiber Optic DVI Transmission System. It carries one (1) unidirectional DVI video, together with DDC, through one (1) multimode fiber. This unique fiber optic transmission system lets your digital flat panel display extend up to 400m at WUXGA (1920x1200 @ 60Hz) resolution.

No user adjustment is required for the Mini-DVI system due to the use of advanced digital fiber optic transmission system technology with zero compression and zero bit reduction. This allows for a quick and easy setup, offering trouble-free operation for many years to come. The Mini-DVI supports video resolution up to WUXGA (1920 x 1200 @ 60 Hz) or 1080p @ 60Hz HDTV video resolution.
